

### 3rd Grade Scavenger Hunt

With the help from your adult chaperone, answer the following questions as you tour the aquarium!

During your visit to the aquarium you will encounter two different types of water: Freshwater and Saltwater. The following questions are related to both. Use the exhibits in the aquarium to help you answer them.

1. As you walk through the conservatory (the first building), name three different types of fresh-water bodies; an example has been provided for you.  
Streams , \_\_\_\_\_, \_\_\_\_\_, and \_\_\_\_\_.
2. Find and name the habitat that has a mixture of freshwater and salt water. This is called brackish water. Hint: This habitat contains very small fish. \_\_\_\_\_
3. Which of these habitats contains salt water? Circle the correct answer. Hint: There can be more than one.

Cape Fear Shoals

Raven Rock

Blockade Runner

Hidden Hunters

Shadows on the Sand

Visit our Loggerhead or Green Sea Turtle. Just like us, they have skin to protect themselves. However, their skin is covered in scales to help protect it from stings that one of their favorite foods can give. What is one of their favorite foods? Select the correct answer below:

Horseshoe crab

Jellyfish

Stingray

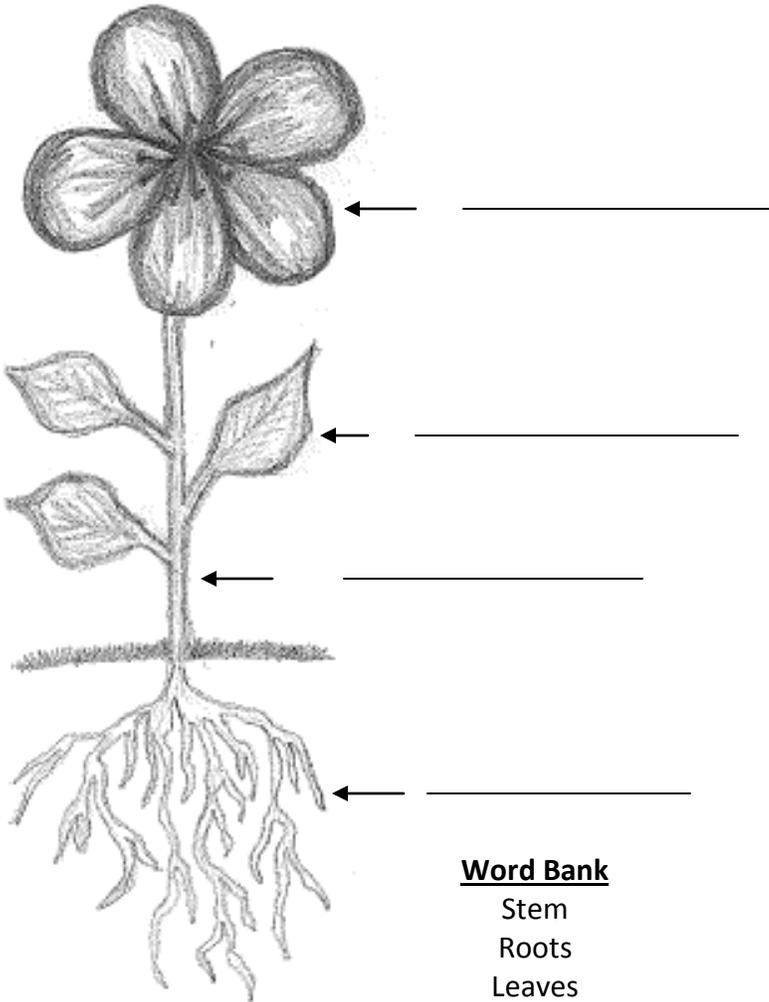

Bees

Scorpions

Label each structure of the plant! Then draw a line to match the function to the correct structure of the plant. Use the word bank for help!

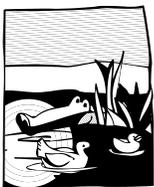

- A. Provide support
- B. Attract pollinators and produce seeds for reproduction
- C. Absorb nutrients
- D. Synthesize food

**Word Bank**

Stem  
Roots  
Leaves  
Flowers

While exploring the conservatory, find a plant that is labeled Swamp Dogwood (there are four labeled). Our two staff members that takes care of our plants, called horticulturalists, have to make sure these plants stay happy and healthy. While examining the plant, list the four things that all plants need to survive. The first one is done for you.

Air, \_\_\_\_\_, \_\_\_\_\_, and \_\_\_\_\_.

Great Job! Thank you for visiting!  
Come back and visit us again soon!
