

Visit Turtle Trails!

(Pre-visit)

Grade Level: 6th and up

As you get ready to visit our aquarium check out our newest research and conservation project at our website. The Turtle Trails website and project uses satellite technology to track rehabilitated cold-stunned juvenile loggerheads. Students can interact with the research team through our “ask the Team” section. The site provides background information on loggerheads, a photo gallery, tracking maps, research logs, and classroom activities (correlated to the NC Standard Course of Study). You can find Turtle Trails at the following URL: <http://ncaquariums.com/turtletrails/>
